### "Two Arabian Knights"

**With Wm. Boyd, Mary Astor, Louis Wolheim.**

"Two Arabian Knights" explodes laughter that will be heard round the world.

Here is intense American humor—the crystallization of native wit, resource, daring and paradox!

Imagine two doughboys, "Brains" and "Good Looks," astray in hostile territory during the war, making holiday and love while fleeing through prison camps and darkest Arabia—danger and death on every side.

Imagine them—once a New York underworld character and the other an aristocrat from Fifth Avenue—hating yet siding each other. And both smitten with the same girl!

**Here is a Colossal Comedy**

"Two Arabian Knights" will break laugh records, and give the world a climax of howls, giggles, chuckles, aches and quakes.

**This Week: "The Stolen Bride"**

### Community Exhibit Credit to District

The W. I. community exhibit at the Carmangay fair was such a success in every way that there need be no doubt the innovation will be repeated next year with better organization and a generally better effort to do the district proud. As it was the exhibit was generally admired and was highly creditable to those concerned in gathering it together. Among those who contributed exhibits were the following: Jake Leback—Cabbage, carrots, cabb, beets, Swede turnips, onions; Conrad Leback—Beets, cabbage, brome grass; John Beaubier, two varieties of potatoes; Mrs. W. Ulrich—Potatoes, cabbage, strawberries, wheat, beans, Bermuda onions; J. N. Beaubier—Timothy, wheat, oats; Mrs. Mifflin—Kohl rabbi; L. B. Othel—Cabbage, cauliflower, onions, currants, chard; Mr. Sanford—Red bobs wheat; T. R. Jopling—Corn; C. E. Anderson—Fall wheat and rye (1928 threshed), tomatoes, turnips, sugar beets, corn; J. S. Sansome—Cabbage, turnips, beets, potatoes, peas, carrots, onions; Mrs. Boner—Beets, cabbage, turnips, carrots; S. Fath—Potatoes and beans; Neil McLeod—Potatoes, brome grass, onions. Flowers were contributed by W. C. Hoskins, J. N. Beaubier and Mrs. Mifflin. To Mrs. M. Sisson and Mrs. Duffy the arrangement of the exhibit, which was artistic in the extreme, was very largely due, together with their assistants, Mesdames Alexander and Woodhull, while Mrs. Sisson and J. N. Beaubier, who did the lion's share of the work in gathering up the exhibit, deserve the best thanks of all interested. While there was no other exhibit of the kind and the first prize of \$50 came by default, the directors of the fair and spectators were unanimous in their opinion that the exhibit was well worthy of the prize and was also a justification of continuing the contest along the same lines another year.

### Local and General

Mr. and Mrs. A. McCullough and family are at Banff.

Assistant Superintendent in charge of Live Stock, Lacombe, Alberta.

Ermann Sisson, of Great Falls, Montana, is on a visit to relatives here.

Mr. and Mrs. Royal Ruggles returned recently from a trip to B. C. points.

Mr. and Mrs. M. Sisson and Mrs. Duffy and children motored to Calgary on Sunday.

Miss White and Mrs. Shaw, of Nanton, were guests of Mrs. W. E. Williamson during the week.

Gladys Anderson, who has been ill with rheumatic fever, is making rapid progress towards complete recovery.

Mrs. Grey, mother of Mrs. J. A. Ruggles of the Guess Ranch, left on Tuesday on an extended visit to points in Montana and Washington.

Mrs. C. E. Anderson wishes to thank the Elks' Lodge and friends who sent the beautiful flowers during the illness of her daughter, Gladys.

Mr. and Mrs. Stag and family, of Edmonton, visited Mrs. Stag's mother, Mrs. E. Gill over the weekend, leaving for Lethbridge on Tuesday.

Successful exhibitors at the Carmangay fair from this district were the McDougall Bros., Brown McDonald, F. X. Beingsner and Mrs. J. M. Moffatt.

Among returning tourists this week are A. Hopkins and party. They indicate a splendid trip to California and back and met many old time friends now located in the south.

E. F. Crawford is disposing of his household effects by public auction on Saturday afternoon at 2:30 o'clock in the Clever addition. The family is leaving at once for Calgary where they will reside in future. Many friends here will wish them happiness in their new home. They will be generally missed here.

## Ready to Serve You

We are ready to serve you for the coming season with the finest stock of nationally advertised clothing that we can procure from the world's markets.

You are therefore always assured that anything you buy at our store will always make good as regards materials, fit and workmanship.

May we suggest that if you need **Shirts, Underwear, Sox, Boots and Shoes, Hats and Caps, Leather Vests, Windbreakers, Sweaters, Overalls, Leather Gloves, Coveralls, Pants and Harvest Blankets** that you first call at our store, and we will be only too pleased to show you our goods.

## JOPLINGS

Mrs. Newman, who has been on a visit to her sister, Mrs. J. T. Stephenson, left on Tuesday on the circle tour through the mountains. She was accompanied by Miss Ella Stephenson.

Among returning tourists this week are F. Clever and family, G. M. Campbell and family and J. S. Collins and family. All are enthusiastic in describing the big time enjoyed while away.

Later estimates of the damage done by frost on Monday night would indicate that there was considerable difference in the degrees of frost experienced throughout the district, with the damage lessening towards the east, as in the vicinity of the valley very little damage is anticipated. Near Champion the frost was fairly heavy and there is little doubt much of the wheat is more or less damaged, although even in this vicinity there appears to have been considerable variation in the amount of frost. The exact extent of the injury to the wheat will not be known for some days at least, and in many instances until the grain is threshed.

H. Schmucke, local weed inspector, wishes to thank the farmers of the municipality for their co-operation in assisting in the destruction of weeds. Where stakes have been placed in the road with a piece of paper attached there are weeds which should be destroyed and those who find these stakes are requested not to destroy them as they will indicate where the same weeds may be expected next year.

Owing to preparations for harvest being under way the Wednesday half-holiday was not observed by Champion merchants this week, and in future all the stores will open on Wednesday afternoons.

Messrs. Moffatt, Henderson and Gates spent the week end on the Livingstone river. They returned home on Monday morning accompanied by Dan Harper and family and Messrs. S. Jopling, D. Running, T. and M. Sletto, who had been on the Livingstone for some days.

## Vegetables and Fruit

Advertisements of Wanted, Lost, Found, Strayed, etc., not exceeding one inch, 50c cents for first insertion. 25c cents for each subsequent insertion.

Commercial rates on application.

THURSDAY, Aug. 16, 1928.

## NOTES AND COMMENT.

The Minister of Education has announced a complete change in the school system of the Province which is anticipated will come into effect next year. The new system will be based on that in vogue in New Jersey and the changes involved will be very marked. The inspector will still function very much as at present but the teachers will be hired by boards to be appointed for the purpose, the school trustees being relegated to simply financing the district and providing school accommodation.

Canada is making quite a creditable showing at the Olympic games now in progress at Amsterdam. It is very noticeable, however, that Olympic contests provide the same difficulties for judges as smaller sporting events and claims of unfairness are plentiful.

After escaping damage until Aug. 13th, the wheat fields in this vicinity were subjected to a frost reported as heavy as six degrees on Monday evening. While the exact damage done is partly conjecture its seriousness cannot be overlooked and there can be no possible doubt the grade of the standing grain will be lowered considerably. Practically all garden produce and flowers were destroyed, with the exception of a few vegetables which frost does not affect.

## POPULATION OF CANADA NEAR TEN MILLIONS—ALBERTA'S POPULATION ESTIMATED AT 613,300 BY BUREAU OF STATISTICS

Ottawa, Aug. 10.—Canada's population is estimated by the bureau of statistics as 9,658,000, an increase of 139,000 over the estimate for last year.

Estimates of population are, in figures for 1927 and 1928, respectively:

Prince Edward Island, 86,700; 84,400.

Nova Scotia, 543,900; 541,000.

New Brunswick, 411,000; 415,000.

Quebec, 2,504,000; 2,547,000.

Ontario, 3,187,000; 3,259,000.

Manitoba, 647,000; 655,000.

Saskatchewan, 536,000; 551,000.

Alberta, 617,000; 631,000.

British Columbia, 675,000; 683,000.

Yukon, 2,470; 2,500.

Northwest Territories, 9,050; 9,200.

When the last Dominion census was taken in 1921, the population was computed at 8,788,000. The increase in the last seven years was, therefore, was 870,000, or an average of 124,000 a year. The increase in population between 1911, the year of the previous census, and 1921 was 1,582,000, an average of 158,000 per year.

This period included the war years.

## ROGER POOCK—THE CHAMPION LONG-DISTANCE RIDER

All British boys will be interested to know that the champion long-distance horseback rider is an Englishman—Roger Poock.

His famous ride was made years ago. He rode alone from Fort Macleod, in Canada, clear through the United States to the city of Chicago—3,600 miles, as far as from London to Chicago.

He made the trip in 200 days. But he was actually travelling only 147 days, so that he averaged 25 miles a day. He made the whole trip with 3 horses.

Poock had been a member of the Northwest Mounted Police in Canada. He has been an adventurer all his life. He has been a cowboy and a gold miner and a scout and a play-writer. He is never happy unless he is in danger.

He discovered that the "Wild West" of the United States is as wild as Siberia or Africa. He passed through Indian villages and robbers' dens. He was in danger from bears, scorpions, wolves and snakes.

He went through the famous "Robbers' Roost"—a high strong-hold where 25 robbers lived and de-

fied the police.

He crossed Death Valley—the hottest place in America—a land without a river or a spring of water.

He spent several days among the Navajo Indians, who are said to be the richest savages in the world. There were 30,000 of them.

He rode through the Great Canyon of Arizona, where a great river runs for 600 miles in a cleft a mile deep.

When he reached Mexico, he was thrown in jail and held for ransom. He went out free and went on his way. He found most of the Mexicans very friendly. Very few families allowed him to pay for his food and lodging.

He discovered that the United States is not at all like Great Britain, where there are good roads everywhere and no robber nor bands of savages.

A brave man—this Roger Poock. He beat all American records for long horseback rides.

After he had reached Mexico City, he met Buffalo Bill, the great actor. "I envy you that trip," said Buffalo Bill.

Poock is too old to-day to make such trips. But he still loves the wild, open country, and a long ride in a country where there are no roads and no towns.

He is a brother of the way, of our famous actress—Miss Lena Ashwell.

## LOVE WILL FORCE OPERATION TO SEPARATE "SIAMSE TWINS"

New York, Aug. 11.—Because one of them is said to have fallen in love and wants to marry, two 17-year-old girls, joined together since birth, are under observation in a hospital here preparatory to an operation to separate them.

Mary and Margaret Gibb, the so-called Siamse twins, are daughters of Mr. and Mrs. J. K. Gibb of Holyoke, Mass. They are joined by a cartilage bond at the base of the spine.

Dr. Francis P. Weston, who has charge of the case, declined any comment other than to say that the proposed operation was very hazardous. He would not say when the operation might be performed.

All previous attempts but one to separate "Siamse twins" were said by surgeons to have proved unsuccessful. The lone successful operation was performed several years ago in Mexico and in that case one of the twins died. They explained that "Siamse twins" usually have some vital connecting link, such as a joint circulatory system or spinal system.

The Gibb twins came into public notice last fall when one of them developed a severe cold, followed by an attack of bronchitis.

The other sister, however, did not contract the disease. It was said that physical pains were communicated by one to the other, but that they had similar emotions and that mental stresses were almost instantly conveyed from one to the other.

The report that Margaret wished to marry and therefore desired to be separated from her sister could not be confirmed at the private hospital where they were taken on Thursday.

## BELGIAN GIRL WALKS FROM LOS ANGELES TO MONTREAL, QUE.

Montreal, Aug. 13.—Miss Yvonne Paquette, a young Belgian girl,

walked from Los Angeles to Montreal, a distance of about 3500 miles, to see her brother, Raoul, but found on her arrival here that her relative had sailed for his native land a few days ago, so she decided to return to the California city and left today on foot.

It took the girl nine weeks and four days to reach Montreal. She left Los Angeles on June 6 with \$8 and had \$2.25 upon leaving here. On her way east, the girl, who said she had been orphaned by the great war and was undergoing a nurse's training course, slept under trees, worked at various jobs, slept under trees, in barns and sometimes even in city alleys, she told newspapermen.

She is a brother of the way, of our famous actress—Miss Lena Ashwell.

NEW acceleration  
-like a shot from a gun...

...due to greatly increased power and vital engineering advancements adding new brilliancy to McLaughlin Buick's VALVE-IN-HEAD Engine!

THRILL with energy—like a split-second that will let no other pass—the 1929 McLaughlin-Buick takes in new and unrivaled power of acceleration. Never was there an automobile so responsive, so mobile, so sensitively flexible. Never an automobile with such dash and spirit. Never an automobile so thrillingly alive to every desire and demand of the driver!

Increased lore and stroke in the world-famous valve-in-head engine—a tremendous increase in power—new and advanced carburetion—high pressure gas pump—all combine to produce accelerating abilities which will be the envy of other motorists.

Pick-up, getaway and top speed—a greater top speed than ever before—all are attained in the fewest possible seconds in the new, 1929 McLaughlin-Buick.

If you want the feeling of dash, power, swiftness—just look over the mighty horse and if you want to experience traffic mastery—just press the accelerator. Drive it and you'll say, there never was a car like this great new McLaughlin-Buick. It provides acceleration like a shot from a gun!

The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

### 500 COMBINES FOR HARVEST THIS FALL

Calgary, Alta., Aug. 11.—Five hundred combines will be operating in Southern Alberta grain fields during the coming harvest, compared with 150 a year ago, according to estimates made to the Calgary branch of the Bradstreet company. Record sales have been made by implement firms in combines this year, and other farm implements, particularly tractors, have shown a big advance, states the latest report of the mechanical agency. Some dealers report an increase of 50 per cent. compared with last year.

Automobile dealers and dealers in accessories and tires state that business in their line has been exceptionally good and increases of 50 per cent. are reported over last year. General wholesale trade is considered as very satisfactory, fruit, grocery, and confectionery houses being very busy and reporting increases over last year of 10 and 15 per cent. Wholesale boot, shoe, and harness dealers and apparel lines are doing a satisfactory business also.

Retail merchants are finding business improved, continues the Bradstreet report. A general increase of 10 per cent. in city business is reported and a very satisfactory fall trade is anticipated. Collections are fair and better than last year. A general feeling of optimism, better than for many years, exists throughout the district in nearly all lines of trade and has continued throughout the summer months in an unusual volume.

### NATIONAL COUNCIL OF WOMEN WILL APPEAL FOR FOUNDATION FUND

A nation-wide appeal for a foundation fund of \$200,000 will be conducted by the National Council of Women of Canada, it is announced by Mrs. Frederick Etherington, of Kingston, Ont., convener of the fund committee. Headquarters have been established in Kingston and preparations are being made to begin the public effort in the latter part of September or early October.

The National Council is a federation of local councils which are composed of women's organizations of every kind. It is represented in every principal city of the Dominion and has a membership which, allowing for duplications, is estimated to exceed 200,000 women.

The foundation fund, when invested by a board of directors to be named, is expected to yield an annual income of \$10,000. This will be used to pay part of the expenses of delegates to national conventions of the organization, and also to continue the work and publish the findings of national standing committees. It is also hoped that the fund will make feasible the establishment of a national headquarters. National officers are—Hon. E. C. Macdonald, president, Hon. J. H. Macdonald, vice-president, Hon. J. H. Macdonald, secretary, Hon. J. H. Macdonald, treasurer.

The National vice presidents are—Mrs. Etherington, Miss C. E. Carmichael, New Glasgow, Mrs. W. Loughborough Cummings, D.C.L., Toronto, Dr. Stowe Gullen, Toronto, Lady Aikens, Winnipeg, Mrs. Charles H. Thornburn, Ottawa, and Mrs. J. G. Gill, Vancouver. The provincial president of Alberta is Mrs. O. C. Edwards, Macleod, while Mrs. A. Muir is president of the Macleod local council.

### PREMIER OPENS NEW CANADIAN PLAYGROUND

Prince Albert, N.S., Aug. 11.—Premier Mackenzie King opened another of Canada's park playgrounds here yesterday. Standing on the shore of Lake Waskia, where thousands of people had gathered in the summer sunshine, the prime minister dedicated the 1274 square miles of forest, lake and river which is Prince Albert National Park.

From the city of Prince Albert the trail to the park wound northward. On it yesterday moved a procession of motor cars swifly to the country where the scene was the great vehicle of summer travel.

Premier King slept last night in the cottage in the park which was presented to him yesterday morning through the generosity of his friends and supporters in various parts of the province of Saskatchewan. An interesting feature of the cottage is that different municipalities gave the furniture for its various rooms.

### CANADA TO SPEND \$200,000,000 ON ITS WATER POWER

Ottawa, Aug. 13.—Two million horsepower will, it is estimated by the department of the interior, be added to the water power installation in Canada within the next few years. This new work will require a direct investment of at least \$200,000,000.

The annual statement of the Hon. Charles Stewart, minister of the interior, with regard to the progress of water power development issued at the beginning of the year predicted an addition of 375,000 horsepower to the total installed in the Dominion during the first six or seven months of 1928. A mid-season review of conditions now indicates

## Something Absolutely NEW!

## Something DIFFERENT!

that during the whole year as much as 550,000 horsepower will be added, either in new developments or in addition to existing stations.

### CHARLESWORTH TO INVESTIGATE L. N. HAIL LOSS

Edmonton, Alta., Aug. 10.—L. Charlesworth, chairman of Provincial Irrigation council leaves the city on Saturday for the Lebridge Northern Irrigation project to confer with settlers there in reference to hail damage. According to the report received from the area some two hundred quarters were hailed out this year. Almost one-third of the total area under cultivation and the settlers who have suffered heavy losses, may need some assistance from the government to enable them to carry on.

Mr. Charlesworth will go carefully into the situation and will report back to the government on his findings. Such action will be taken as may be found necessary to provide the necessary relief.

## SMOOTHNESS and ENDURANCE never before known at the price

The New Six - Built to Last

WITH its sound basic design and its background of scientific development on General Motors Proving Ground—with its production advantages provided by the vast facilities of General Motors with its score of engineering advancements, including the famous G-M-R cylinder head—

—Pontiac Six offers a combination of smooth six-cylinder performance and high-speed endurance, the equal of which is found in no other car in the world selling for so low a price.

Its smooth, silent performance, combined with the beauty and luxury of its Fisher bodies, provides a measure of owner satisfaction unequalled in its field. And its tremendous endurance results in unparalleled length of life, which in turn, is expressed in consistently high resale value.

More important reasons for the selection of any car have never been found. That's why ever-increasing thousands are choosing the Pontiac Six . . . why Pontiac sales for 1928 are far ahead of previous records.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

Canada To The Fore

The breaking of records by Canada is becoming a commonplace. It is indeed an oft year when in some branch of human activity and endeavor, this young Dominion does not attract world attention to itself by some new and startling achievement.

Prior to the war, Canada was hardly known, even as a name, to the vast majority of the peoples of Europe, and those who recognized the name had but slight knowledge of the country. To most of the world, Canada was one of the colonies which Britain had scattered here and there over the face of the globe, but which was of little value and of still less importance in world affairs.

In the war Canada made a name for itself, and other nations were suddenly made to realize that there had arisen in the western hemisphere a nation which already was helping to write history in large and impressive characters and was destined to have a profound effect upon international relations, political and economic. Canada's war effort served, perhaps as nothing of a less spectacular nature could have done, to turn the attention of the people of the United States northward, and awaken them to the fact that the value of North America was not to be found within the confines of the republic; that, on the contrary, a second American power was rapidly developing at their very doors.

Since the war the reality of this fact has been emphasized. Long the world's greatest exporter of wheat, the United States has seen Canada pass it and secure that title by a wide margin. Within the past year or two, the United States has been forced to also relinquish to Canada the distinction of being the world's largest manufacturer of paper. Steadily, year by year, Canada has been passing other countries in the production of gold and is now within measurable distance of overtaking the United States and assuming second place to South Africa.

Contributing a volume of importance to the total trade and commerce of the world a half generation ago, Canada is now one of the world's greatest traders, a factor to be reckoned with in all the markets of the world. Before the war, dependent upon the money markets of Great Britain and the United States to finance its many undertakings, Canada today are able not only to finance their own country, but to an ever increasing extent are financing huge undertakings in other countries, while at the same time rapidly buying back into full Canadian control many large corporations of this country which in years of our financial immaturity were financed and controlled by British and United States capitalists.

The war, and Canada's significant participation therein, also had the effect of raising the international status of the Dominion, giving it not only a status of equality with Great Britain within the Empire, but the rank of a nation in the council of nations. The refusal of the United States to join the League of Nations undoubtedly had the effect of the more directly focusing attention upon the North American nation which did join, and placing Canada in the forefront in the League membership.

And since destiny thus called upon Canada to play its part in the International arena, this Dominion assumed the responsibility with dignity and real effectiveness. Its place around the council board at Geneva has been no minor or insignificant one. Rather, Canada has wielded an influence possibly out of proportion to its present population, but in keeping with the growing importance which other nations now attach to this Dominion.

Having thus moved out into the great international arena, Canada this year decided to be worthily represented at the Olympiad, the great meeting place of the athletes of the world. Despite its small and widely scattered population, this young Dominion dared to try conclusions with the much more numerous representatives of other countries in the field of sport and athletic skill and endurance. And again Canada surprised the world. The sons and daughters of the Dominion carried the flag of Canada to victory time and time again, winning many of the premier events. A Canadian school boy, Percy Williams, of Vancouver, achieved the double victory of winning the 100 metres and the 200 metres race, regarded as classics of the great meet. Ethel Catherall, a Saskatchewan girl, won the high jump in doing so established a new world's record. A quartette of Toronto girls also broke the world's record in winning the 400 metres relay race. Considering the number of events in which the Canadians participated, no other country in the world approached their record.

Canada's future is assured when it can produce virile and courageous young men and women of the stamp of its representatives in the Olympic games, and in the hands of such youth its position as a great agricultural, mining and manufacturing country, as a leader in world finance, and as an arbiter in international relations, is assured. Canada is coming into that proud position which Nature through her bountiful endowments intended it should occupy, and if the Canadian people continue to regard each new achievement as an incentive to still greater effort and enterprise, another generation will see their Dominion occupying a world position second to none.

## National Radio Chain

Broadcasting Companies To Improve Quality Of Radio Programs

A national chain broadcast organization, divided into five sections, will commence operation about September 1. It was announced in Toronto, by R. W. Ashcroft, who has been appointed manager of the newly formed Trans-Canada Broadcast Company.

Mr. Ashcroft said the organization of the company was the outcome of a suggestion by P. J. A. Cardin, minister of marine and fisheries, that it be made by Canadian broadcasting companies to improve the quality of domestic radio programs.

Key stations of the new organization will be located in Winnipeg and Toronto. Stations in Montreal, Ottawa, Kingston, Hamilton, London and Quebec, will be linked up with the eastern section and stations in Saskatoon, Regina, Edmonton, Lethbridge and Vancouver with the western section.

Teichner said the United States' failure to invite the Soviet to sign the pact indicates "a desire to make the pact an instrument of isolation and struggle against the Soviet."

The statement asserted that the pact was incapable of preventing "because it does not provide for obligatory disarmament."

Charity covers a multitude of sins that should be allowed to remain un-

Foreign Minister of Soviet Republic refers To Failure Of U. S. To Invite Russia To Sign George Teichner, foreign minister of the Soviet Republic, issued a lengthy statement to the newspapers hinting at the necessity of the Soviet being one of the original participants in Secretary of State Kellogg's anti-war treaty.

Teichner said the United States' failure to invite the Soviet to sign the pact indicates "a desire to make the pact an instrument of isolation and struggle against the Soviet."

The statement asserted that the pact was incapable of preventing "because it does not provide for obligatory disarmament."

## Will Need Trained Voices

Talking Movies Will Have To Be

Proving To Audiences

The "talking movie" is just now being much talked about. Producers think it will greatly increase attendance on the pictures. That may be so. But it won't unless movie actors and actresses learn to speak as well as to "register emotion."

A voice has as much personality as a face, perhaps more. As long as it is not allowed to interfere with the face, all goes well; but when the face on the screen is fascinating, and the voice uncalculated and feeble, the contrast makes the audience uncomfortable or amused. Neither state of mind is good for the box office.

## Imperial Oil Development

Spending Millions Dollars In Improvements To Regina Plant

When two new storage tanks to be built by the Imperial Oil Company for the plant at Regina are completed, the company will have spent something very close to \$1,000,000 in improvements within 12 months. Last year the company spent \$750,000 in plant equipment. This year a road of making plant has just been completed at a cost of \$300,000. The two new storage tanks, both of them 120 feet wide every way by 42 feet high, will cost something like \$150,000.

## GIRLS AND WOMEN NEED RICH BLOOD

This Lady Found Dr. Williams' Pink Pills A Friend Indeed

Just because she is a woman there are times when every woman needs help and strength in the form of a blood-building tonic.

To thousands of girls and women Dr. Williams' Pink Pills have proved a blessing because they enrich the blood, give strength and restore tone to the aching nerves. The unspeakable girl who is languid and tired, the weary whose back feels like breaking; the man whose blood is thin and weak; the mother whose blood is poor and who is usually caused by poor blood or nervousness. Girls and women are usually caused by poor blood or nervousness. Girls and women are usually caused by poor blood or nervousness.

And again now that the girlhood stage is past and I am a mother of four children, subject to all the cares and worries of the home, Dr. Williams' Pink Pills are the one tonic I take to keep up my health and strength, and they have never failed me. Should any ailing girl or weary mother due to my advice try these pills, I know they will find them as equally good as I have found.

And again now that the girlhood stage is past and I am a mother of four children, subject to all the cares and worries of the home, Dr. Williams' Pink Pills are the one tonic I take to keep up my health and strength, and they have never failed me. #### CHAPTER XXX—Continued

Only desperate men would ever have dreamed of such a plan as this. The camp was fenced with eight strands of barbed wire, and every sixth fence-post carried an ear light. But with the aid of a few wire which the men possessed, they would cut the two lower strands, at dusk, just before the lamps were lighted, and crawl through. At the last moment the other two men grew panicky.

"It is sure death," said one: "they'll catch us. I can see how they are watching us. I'd go, and take a chance only I have a wife and kid—I've got to think of them."

The other man declared the plan a foolish one on account of the weather. "January in Germany is too much like the corner of Portage and Main," he said.

A new batch of prisoners had come in that day, and one of them was standing near enough to hear, came to Jack and asked if he might go. He was a grizzled man of about thirty-five.

"I have no one depending on me," he said, "and I have already tried twice."

"Come along—sure," said Jack. "Three times and out."

"Thank you so much," said the man heartily.

Jack was startled by his politeness. A prison camp does not always foster the social amenities.

"Your name is Doran, is it not?" asked his new friend.

"Mine is English—at least that is my nickname. We are both from Canada."

"We might as well try

boldly into a garden as they came through a village. He had way of quieting the dogs by a peculiar whistle and this gave him a distinct advantage. The dogs who were barking fiercely, changed their attitude when he spoke to them, and even showed a disposition to follow him.

"If the dogs could bring us food we would have plenty," he said that day, as they sat in the grass thickets. "The chances are against us, Jack, but one of us may get over."

"One of us!" exclaimed Jack. "It must be both or none!"

"No!" said the other, "it does not matter much about me. One or two very much, and it happens that the one person who cares a little bit about me, cares very much about you."

Jack looked at his companion—dishevelled, dirty, long-haired and long-whiskered, his eye bloodshot—and wondered if his mind were going. "And who is that?" he asked gruffly, as if he would humor his poor friend's mood.

"My wife, Helmi,"

"Helmi!" Jack repeated, "My Helmi!"

"Yes, yours—she is the only woman except my mother who ever cared whether I lived or died."

Then he told Jack of his quarrel with Larsen in Eagle Mountain, and of Helmi's kindness, and of the week he had stayed in her house.

"She asked me to pray for you, Jack," he concluded, as he spoke.

"Then you are Arthur Warner, and I have been doing you wrong in my thoughts. No one told me you were here, and I was sure I could not."

"Then you are Arthur Warner, and I have been doing you wrong in my thoughts. No one told me you were here, and I was sure I could not."

"Then you are Arthur Warner, and I have been doing you wrong in my thoughts. No one told me you were here, and I was sure I could not."

## Assorted Sandwich with rich Cream Fillings

#### Teeth and Health

Issued By The Canadian Dental Hygienists' Association  
By The Saskatchewan Dental Society

#### THE SIX YEAR MOLAR

You have heard your dentist call this first double tooth "the six year molar."

Why is this? You have perhaps guessed it—that it is because it erupts usually at about the sixth year.

Now, you have been observant enough to note that it is a first tooth in the sense that no tooth was lost to make room for it.

And coming in at this early age you may have thought it "the six year tooth" which would, in due time, be shed.

No, in your child, you have perhaps neglected to give it the care that it deserved—with disastrous results.

Without doubt, this neglect is the most common of dental sins committed by parents, and perhaps with gravest consequences to their child's teeth.

Therefore, should this tooth become so badly decayed from four to six years of age that it is unable to erupt, your dentist as a rule, has no recourse but the use of the forceps, and, lo! the tooth, the whole series is deranged, since, in a few days, the six year molar is the key tooth of the dental arch.

However, Nature is gracious, for sometimes you will find that, where this tooth has been lost at an early age, the second molar has "drifted" forward to fill the space, with the third molar advancing in turn as it erupts. But this is only rarely the case—rather a little rare at the present time to prevent this trouble rather than to rely on Nature for a cure.

#### Co-Operative Wool Growers

Shipments Already 50,000 Pounds  
Over That of Last Year

With the shipment of 12 carloads of domestic wool from Regina, recently, the Canadian Co-operative Wool Growers' Association is already 50,000 pounds over last year in its shipments from Saskatchewan.

Manitoba, according to W. W. Thompson, manager, at Regina.

Mr. Thompson said two more carloads would complete the season's work, and he anticipated that in the next two months the 1926 shipments would equal the record of 1925.

100,000 pounds over those of 1925. A substantial increase also has been shown in the range wool shipped from Maple Creek.

The Many-Purpose Oil—Both in the home and stable, there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and neuralgia, sore throat and cold.

It is a valuable remedy for all ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made famous the name of Dr. Thomas for over a century.

"I notice that the humorists have been picking on the mosquito a good deal lately," writes J.H.M. "But I can assure you that the mosquito has his good points. Here's a hospitable camp; he'll give you a bite and a swell time afterwards."

Papa—"But has he any self-confidence?"

Pearl—"He must have. Dad, he opened a checking account with borrowed money."

According to a recent announcement, Tokio, Japan, has nearly 4,000 confectionaries and bakeries, and only about 1,000 meat markets.

The kind of person Barnum said was born every minute is now born twice a minute.

Minard's Liniment—the universal remedy.

## "Christie's" of course

There is something so exceptionally appealing about Christie's Assorted Sandwiches, a combination of deliciously flavored cream fillings and crisp biscuits that fairly melt in your mouth. Vanilla, Chocolate, Strawberry, Orange flavors.

In the store or on the phone, always ask for

#### Granted Temporary Parole

Two Negroes Sentenced to Death May Escape Penalty  
Governor Graves, of Birmingham, Ala., granted a temporary parole of 60 days to two negroes convicted of murdering a negro woman, later returned to his home after several months' absence on a visit to relatives.

The two men were charged with chopping the woman to pieces, placing the body in a barrel, and throwing them into the Alabama River. The parole was granted pending an official investigation.

His purposes will ripen fast, Unfulfilling every hour, That evert will be the flower. Blind unbelief is sure to err, And catch his own light to begin; God is his own interpreter, And he will estimate it plain.

—William Cowper.

There is nothing in what has been or befalls you which justifies impatience or peevishness. God is inscrutable, but not wrong. Remember if the cloud is over you that there is a bright light always on the other side; also, that the time is coming, either in this world or the next, when that cloud will be swept away, and the fulness of God's light and wisdom poured around you. If your life is dark, then walk by faith; and God is pleased to keep you as safe as if you could understand everything.

—Hudson Bunell.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

Homes For French Poor  
Paris is preparing to turn land-lord on a large scale. Construction of modern apartments, on the site of one-time fortifications, is now under way. Officials estimate that 10,000 Parisian families will be housed in the new buildings at a cost of about \$100 a year, for four rooms and bath.

Export Trade With Germany  
Canada's export trade with Germany will be greatly increased under favorable treaty agreements, which the Dominion is now endeavoring to establish with that country, according to Mr. B. Palmer, newly appointed Assistant Canadian Trade Commissioner at Hamburg.

Contract For Plane Hangar  
The defence department is going to construct a large hangar for airplanes at the Rockcliffe Airfield near Ottawa, and the contract has been secured by MacDonald Brothers, Ottawa, the amount being in the vicinity of \$25,000. It was announced.

Let Minard's Liniment Relieve Pain.  
Minard's Liniment has relieved 57,000,000 cases of land to railway companies in the Northwest.

Canada is 13 times as large as France, 50 times as large as Spain.

HECULES  
PERMANENT BUILDING PAPER

Beauty in a home may be only skin deep.

A beautiful home is not always comfortable nor easily salable.

Hercules does for a home what beauty cannot. Tested and proven wind proof and damp proof, Hercules makes a home warm and dry at all times—the home that buyers seek.

Hercules comes in three grades—No. 1, No. 2, and No. 3. Hercules is easily understood after an examination. May we send a few samples?

## What Will you do

## When your Children Cry for It

There is hardly a household that hasn't heard of Castoria. At least a million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any sight may find you very thankful there's a bottle of Castoria. Just a few drops, and that colic or constipation is relieved; that diarrhoea checked. A vegetable purgative; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advising to give to infants. Castoria. Medicine is dangerous to a tiny baby; however harmless they may be grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may save you a sleepless anxious night. It is always ready, always safe to use. In emergency, it is for everyday ailments. Any hour of the day or night that baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

## Fletcher's CASTORIA

#### Sir George Will's Estate

The fortune magnate, Sir George Alfred Will, who died July 11, left a fortune of \$50,000,000. The bulk of the estate goes to his children, but at least twenty millions will go to the government in the shape of a levy on inheritance. Sir George was the tenth of his family to leave an estate exceeding a million pounds.

An auto bus company in Europe is compelling each passenger to buy in addition to the regular ticket, a special slip covering his share of the gasoline tax.

The world's fastest for the one-mile walk, was set by G. H. Goulding, of Toronto, Canada, in 1918. His time was 6 minutes and 25.3 seconds.

The name "midshipman" for cadets was first mentioned in the English navy about 200 years ago.

VERY HARD PIMPLES ON FACE

Was Terribly Disfigured. Healed by Cuticura.

"My trouble began with small pimples breaking out all over my face. They were very hard and itched, and I was very uncomfortable. I tried many remedies, but nothing helped. I was terribly disfigured. The trouble lasted over a year."

"I used several well-known remedies without success. I decided to try Cuticura Soap and Ointment as purchased at the C. S. C. Company, along with the Cuticura Ointment, and the Cuticura Soap. I am glad to say that I am cured. (Signed) Edward Kelly, 87 Mountain, Ont.

## SEES NO SIGNS OF DECADENCE IN BRITISH EMPIRE

London, Eng.—"I am going back better pleased than ever that I am a British citizen," declared Premier G. H. MacDonald, before his departure for Canada.

MacDonald, Premier of the United Kingdom, is now in Britain and Europe studying migration possibilities, educational systems and agriculture since early in June.

"The man is a fool who says that the British Empire is decadent," Premier MacDonald said.

"Like every other country in the world, England lost a generation of the brightest and most promising men who were on the threshold of business or public life. The still younger group who were then born in the military age are now coming on. The next ten years ought to be the most striking in the whole history of Empire development."

The premier said he found conditions in Scotland and Ireland greatly improved.

Speaking of agriculture in Britain, Premier MacDonald said that an all-round good crop meant ultimate prosperity.

"I can see a distinct advance everywhere in interest overseas," the premier declared. "The pressure of the unemployment problem, by bringing of it a greater consolidation of imperial sentiment and imperial forces generally."

### Ontario Wheat Pool

Meets With Good Success After One Year's Operation

Chatham, Ont.—In one year of operation the Ontario Grain Pool has proven an outstanding success, and, according to present indications, greater things will be achieved in the next year. The farmers have been educated to realize the benefits of co-operative marketing, and they are showing solidly behind the movement in Ontario. These facts were brought out at a meeting here, when the pool's affairs, past and present, were discussed.

The speakers were Colin H. Russell, Winnipeg, president of the Manitoba Wheat Pool, and H. C. Gilroy, Alvin, president of the United Farmers of Ontario Co-operative Company. David H. McCarty, Warburg, Kent County representative on the Ontario pool directorate, acted as chairman, and at the close of the morning meeting was unanimously re-elected to the governing board of the pool.

Mr. Gilroy told of the remarkable progress made in the pool movement in Ontario in a year, during which time hundreds of five-year contracts have been signed. He was assured of observation throughout the grain-growing areas that the growers were becoming convinced of the soundness of co-operative marketing and would join the pool in next winter months.

### Unable To Visit Canada

Ottawa—Information has reached the Government here that Lord Haldane, who will act as Prime Minister of Great Britain in the absence of Rt. Hon. Stanley Baldwin, will not now come to Canada with the Empire Parliamentary Union, which is expected to arrive here the last week of August.

### Noble Submits Report

Rome—Premier Mussolini has received General Umberto Nobile, who presented to him his first report of the Italia disaster. The Italian premier sometime ago informed the cabinet that a complete investigation would be made into all phases of the loss of the North Pole dirigible.

### Given Farewell Luncheon

Winnipeg—Dr. R. C. Wallace, who will assume the presidency of the University of Alberta, was tendered a farewell luncheon by members of Manitoba Mining Association. A presentation was made Dr. Wallace by Col. H. P. Osler.

### Venuses In Eruption

Naples, Italy.—The volcano Mount Vesuvius is in eruption, the clouds of smoke and lava being visible for 25 miles. A cordon of troops has been established about the cone to keep tourists from the danger zone.

### Respect For Flag

Kingston, Ont.—Ontario Junior Canadian Legion, in convention here, condemned the use of the Union Jack to drag desks at schools, etc., and would have it used only as a flag.

### Bombs Thrown By Bandits

St. Paul, Minn.—Bandits by train have thrown by handbills the driver and five guards of the St. Paul and Northern Pacific passenger car were robbed of \$20,000 in currency here recently.

## Italian Submarine Disaster

Twenty-seven of Crew Perish in the Tragically

Rome—Poisoned by acid fumes or drowned in the first rush of water, the crew of the Italian submarine "U-4" sunk in a collision in the upper Adriatic, died to a man at the scene apparently with fortitude and resignation.

The stricken submarine was raised to the surface after 34 hours of desperate labor by divers who worked hour after hour to attach air-sigs to the sunken vessel and to fasten steel cables in order that she might be lifted to the surface.

Twenty-seven perished in the tragedy. First reports received by the naval authorities indicated that there were 21 men aboard, but a check of the bodies today revealed that there were two officers, Captain Well and Commander Pasoli.

Captain Well and Commander Pasoli were both at their posts of command in the conning-tower while the remaining members of the crew were all found dead at their stations. There were no visible signs of panic aboard the boat.

## Pilgrims At Ypres

Impressive Ceremony Is Held in Which 11,000 British Veterans Participated

Ypres, Belgium.—Eleven thousand British veterans of the Great War, including 3,000 women who served in various capacities during those four terrible years, gathered about Menin Gate on Aug. 8th for a solemn ceremony in commemoration of their comrades who fell in the desperately bloody salient.

Among them stood the Prince of Wales, Lady Haig, the widow of British's victorious commander; Admiral Jellicoe, president of the British Legion, who headed British's naval forces in the great struggle, and other distinguished figures who bore a share in the battle of Ypres.

The pilgrims had come, some marching along the familiar roads of the front, their numbers swelled by thousands who had gathered to witness the ceremony until it was estimated that nearly 20,000 men, women and children joined in the opening hymn, "O Valiant Hearts."

The service, in which the huge congregation participated, was beautifully simple and supremely impressive.

## Storm-Swept Florida

Hurricane Creates Havoc Over a Wide Territory

Jacksonville, Fla.—The hammering of communities in the sparsely settled sections of East Central Florida, the tropical storm emerged to devastate hundreds of other towns in the rich central citrus country.

City officials at Winter Haven, approximately 50 miles east of Tampa, related that winds of 75 miles an hour velocity had followed earlier gales of 40-mile speed.

The damage done for the great citrus orchards, laden with fruit, in the immediate path of the storm.

Meanwhile reports trickling in from the country within the next storm front and the Atlantic told of half a dozen towns and communities visited by damage from the storm.

## Co-Operative Movement

Wholesale Society Expects To Establish 300 Stores In Saskatchewan  
Saskatoon, Sask.—Referring to the recent announcement of the formation of the Saskatchewan Wholesale Society, which is being sponsored by United Farmers of Canada, the society's president, Mr. J. H. H. Osler, said that the society was as near as possible, W. Moss Thrasher, secretary, said that about 200 stores would be established within the first year.

Preference will be given to districts known to be favorable towards co-operative effort. Within the first year the society hopes to see between 700 and 800 trading units founded so that the province will be fairly well covered.

## To Identify British Products

London.—"Empire marketing begins at home," inscribed on a tin can, is a feature of the national park designed for the furtherance of a government scheme for ensuring the identification of British products.

## Bombs Thrown By Bandits

St. Paul, Minn.—Bandits by train have thrown by handbills the driver and five guards of the St. Paul and Northern Pacific passenger car were robbed of \$20,000 in currency here recently.

## New Telephone Service

Mid-Canadian Phone Service Between Winnipeg and Regina Is Inaugurated

Winnipeg—Inaugurating the all-Canadian telephone service between Winnipeg, Toronto and Montreal, via Port Arthur and Port Williams, the all-Canadian Pacific Telephone Company, the Canadian Pacific Railway and the Manitoba Government, recently spoke to one another across 1,600 miles of copper wire.

The new line between Winnipeg and Regina is approximately 1,600 miles, and is erected on Canadian Pacific telephone pole line from Manitoba to Sudbury, via Port Arthur and Port Williams; from Sudbury it connects to all eastern points by the Bell Telephone Company's lines. The third stage is the third stage in the all-Canadian telephone route, the first being Winnipeg to Alberta in 1922, the second Winnipeg to the head of the Lakes in 1924.

The fourth stage is now being completed across the Rockies, the Canadian Pacific right-of-way being largely used, construction work is being completed for the coast-to-coast telephone service entirely within the Dominion.

## COMES TO AMERICA

Hon. Mrs. Lord Guinness, one of the most beautiful of English aristocrats, is to take up residence in Pittsburgh, Pa., with her husband, who has been placed in charge of his father's business in that city. Before her marriage, a year ago, Mrs. Guinness was Hon. Joan Yvonne-Bulwer, daughter of Lord and Lady Churston.

## British Harvest Help

Satisfactory Arrangements Completed With the British Government

Ottawa.—Satisfactory arrangements have been completed with the British Government for the movement of harvest help from the British Isles to the wheat fields of Western Canada, according to a statement issued by the department of immigration and colonization.

This movement, which will begin at once, will be under the direction of the British Government, the Canadian National Railways and the Canadian Pacific Railway.

The two railways will be responsible for placing the men in harvest employment on their arrival from the Old Country and the Dominion Government and the Provincial governments will co-operate with the railways in placing these harvesters in winter farm employment in Canada after the rush of the harvest work is over.

Satisfactory arrangements have been made for the return, after these harvesters for whom winter farm employment cannot be found.

## English School Girls Arrive

Will Make Educational Tour Of Canada From Coast To Coast

Montreal.—Twenty-five English school girls have arrived in Canada to begin a two months' trip arranged under the auspices of the Imperial Daughters of the Empire.

Their itinerary, which takes them from Maritime provinces, to western provinces, to Ontario and Central Canada, the Rockies and the West, has been planned to give the girls a taste of the various phases of Canadian life. The party will return home on October 11.

Long Trek For Pension  
St. John, N.B.—"Disabled soldier on his way to Ottawa to fight for pension that was taken away," is the inscription on a placard which Joseph McIntosh, a returned soldier, wears across his shoulders as he left the city on a long trek to the federal capital to seek renewal of his pension of \$110.75 a month.

## French Airman Killed

Paris—Captain Labbe and three assistants were killed when their plane crashed at Bourges near the end of a 24-hour flight. The plane was burned. The charred bodies of the men were recovered from the wreckage.

The plane was on its way to the city with parcels for delivery. A new air route given bi-weekly express service in each direction between Toronto, Ottawa, Montreal and the steamship of Rimouski. Two days is gained over regular express schedules, western consignments being transferred to the Vancouver Express at Toronto.

## French Plane Crashes

Maurice Drouhin, Noted French Aviator, Is Fatally Injured

Paris—Another attempt to fly from Paris to New York ended in disaster before it had even begun.

The giant tri-motor "Rainbow" crashed on the landing field at Orly aerodrome, killing the mechanic, Lantier, fatally injuring the pilot, Maurice Drouhin, and French flyer, and injuring two others, Gnanoli and Manuel.

The big plane, designed by René Drouhin, and built entirely of wood so constructed that all of its essential machinery would be acescent. During flight, the complete wreck of the wings, fuselage and tail parts of the plane, was being strewn for 1,600 yards along the field.

"The Rainbow" was being put through its final test preparatory to a start across the Atlantic this week when the accident occurred.

It was racing close to the ground at about 125 miles an hour when a few spectators noticed a huge wing wobbling. The engines were then, then, but the deformation of the wing caused the giant plane to shoot all most perpendicularly into the air to a height of about 400 feet. There it slid to one side, apparently refusing to respond to the controls.

It reached the ground, it tore through a strong wire fence, knocked over four posts, and crashed against the corner of a hangar, coming to a stop a crumbling wreck on the road bordering the field.

## Dies From Wounds

Stefan Raditch, Croatian Leader, Succumbs To Injuries

Vienna.—Stefan Raditch, Croatian peasant parliamentary leader, died here today of wounds received in a battle with Czechs, capital of Croatia. The city was grief-stricken and troops are everywhere ready to suppress trouble.

Raditch died of wounds received last June 20, in parliament, when a radical deputy, Puma Raditch, infuriated at frequent interruptions, whipped out his pistol and fired six shots into a group of Croats.

Each shot claimed a victim, two being killed, one of them a nephew of Raditch, and four wounded.

For a time Stefan Raditch's condition improved, but he suffered a relapse which finally brought about his death.

Since his assassination Croatia has been in a condition almost of martial law, with troops patrolling its cities' streets to quell possible peasant demonstrations occurring as a result of the episode.

## A Message To Women

Believe In Equality Of Sexes  
Toronto.—Miss Lillie MacDonald, when visiting here with her father, Mr. J. H. MacDonald, president of the Ontario and Central Canada, the Rockies and the West, has been planned to give the girls a taste of the various phases of Canadian life. The party will return home on October 11.

"Women are coming into public life to work against men, but to co-operate with them in improving public affairs. I do not believe in equality of sex, but I believe in equality of men and women cannot be compared. Women are just as important as men but they are not equal any more than A and B in the alphabet."

Jack Hersey, well-known northern, man of affairs, following a search for many years along the north shore of the lake, which has been rumored to be rich in gold-bearing ore.

Tests made at the University here disclose that some of the ore carries a content of precious minerals as high as 84 per cent, although this has not yet been confirmed.

According to another northern, Charles L. Large, president of the syndicate which is outfitting to head for the scene of the new find, one of the assays gave average return of 45 per cent of some of the quartz shipped south from the scene of the find.

## Leaves Big Fortune

London, Eng.—Capt. Alfred Lowenstein, the Belgian capitalist, who met his death by falling or jumping from an airplane over the English Channel the night of July 4, lost \$600,000 in the three weeks preceding his death, according to the Evening News. This newspaper said it means that Lowenstein left \$400,000 to be equally divided between his wife and son.

## Hickman Sentenced

Los Angeles—William R. Hickman was sentenced to be hung at San Quentin penitentiary on October 10 next, for the slaying of Marjorie Parker, judge Douglas Edmunds over-ruled nine defence objections before setting the second hanging date for the 12-year-old school girl here last December.

## May Defer Old Age Pensions

Toronto, Ont.—Old age pensions may be deferred in Ontario for another year. This was the decision of the Ontario legislature, and the bill may come up on the eve of the next election.

## Buys New Plane

Duessau, Germany.—Charles A. Levine, first trans-Atlantic aeroplane passenger, has purchased a Junkers plane of 450 horse power, and has made a large influence on the importing trade in Canada.

## RAILWAYS MAKE PREPARATIONS TO HANDLE CROP

Montreal.—Canadian railroads are completing plans for meeting the 40,000 harvesters called from Eastern Canada to help harvest the expected record wheat crop in the West.

The Canadian Pacific started its first excursion from the Quebec district on August 14, and one from New Brunswick, August 16. The fare from stations in Ontario and Quebec is to be \$15, and from points in New Brunswick, St. John, and west, \$20 to Winnipeg, plus half a cent a mile beyond all points in Manitoba, Saskatchewan and Alberta, to and including Edmonton, Calgary and Macleod.

The harvesters are all destined to Winnipeg, whence special arrangements have been made for their speedy distribution to points in the West where they are most needed.

Rates have been set at 40 cents from Winnipeg to points in Ontario and Quebec, and \$25 to New Brunswick, plus the half-cent-a-mile-rate to Winnipeg from points in the West.

The Canadian National will run its first excursion from August 9 to August 21, special provisions being made for the care of families travelling on harvesters' excursions over the Canadian National system.

Preparations are practically completed by the railroads for movements of the new harvest. The Canadian Pacific has set aside more than 10,000 box cars for the movement, a great number than in any previous year. Seventy-nine great engines have been ordered from the east of Lake Erie, in the province of Saskatchewan, according to a statement made by Ed. Meyers, Port Huron, Mich. man, who is now in the city.

Jack Hersey, well-known northern, man of affairs, following a search for many years along the north shore of the lake, which has been rumored to be rich in gold-bearing ore.

Tests made at the University here disclose that some of the ore carries a content of precious minerals as high as 84 per cent, although this has not yet been confirmed.

According to another northern, Charles L. Large, president of the syndicate which is outfitting to head for the scene of the new find, one of the assays gave average return of 45 per cent of some of the quartz shipped south from the scene of the find.

## EXTENSION OF PREFERENCE IS EXPECTED SOON

Ottawa.—The Citizen says: "A very important regulation, vitally affecting British trade with Canada, is scheduled to go into effect this autumn, when just when this will be for the government to decide."

"As a matter of policy it has been agreed to increase from 25 to 50 per cent the requirements of Empire labor and materials in British importations in order to entitle them to the highest preferential tariff, but this is operative, customs regulations have to be devised and put into effect."

"As the idea originated with Hon. J. A. Robb, his return from abroad next week is awaited before regulations are considered."

"There have long been complaints about goods, very largely manufactured in foreign countries and then sent to Great Britain for the finishing touches and shipped from there as 'Made in England,' thus being eligible for the British preferential tariff."

"The new exaction of fifty per cent. Empire labor and materials will tend to rectify this, but will make a large influence on the importing trade in Canada."

## Air Express Inaugurated

Before the propeller stops whirling the Canadian Pacific Express truck is on its way to the city with parcels for delivery. A new air route given bi-weekly express service in each direction between Toronto, Ottawa, Montreal and the steamship of Rimouski. Two days is gained over regular express schedules, western consignments being transferred to the Vancouver Express at Toronto.

## CHAMPION CHATTER

VOL. 1

Thursday, Aug. 16, 1928.

No. 27

Published in the interests of the People of Champion and Farmers of this vicinity.  
**GEO. L. DEPUÉ, Editor.**

## EDITORIAL

There have been a lot of suggested reforms, some good and a plenty not so good, but in our modest opinion what the world needs most is dollar-a-dozen golf balls, a straw hat that won't roll, less water in canned tomatoes, and more apples in applesauce.

Dell Cool has taken delivery of a 15-30 Mc-Drig tractor, along with a 16 ft. swather, pickup and combine.

## Financial Advice

If you are going to borrow money, borrow it from a pessimist, because he never expects to get it back.

Royal Buggies has taken out a 10 ft. Mc-Drig power binder.

But speaking of bor-

rowing Dunk says: "It's easy enough to borrow trouble due to the fact that it's a woman's complexion is by what it seems not to be."

We have a car of combines on track waiting for the platform to unload on.

Tom and Martin Sletto have taken out their combine and swather.

We like to think we are rendering a service to this community by running this business. We hope you think so too.

## Women's Institute Meeting

A most successful meeting of the Champion Women's Institute was held on Tuesday afternoon at the country home of Mrs. Fred Wise, with about twenty-five members present.

Mrs. J. D. McDougall was refreshment convener, assisted by Mrs. P. M. Patterson and Mrs. Wise.

Roll call was answered by canning recipes and many tested and tried recipes were exchanged, with interesting discussions.

The committee appointed at the previous meeting to draft a constitution and by-laws governing the local branch, reported through the convener, Mrs. Bastin; the document was given first reading and then laid on the table until the next regular meeting to permit possible changes before adoption.

Saturday, Sept. 1st, was the date decided upon for the annual flower show, and all preliminary arrangements were left with the general committee of which Mrs. B. Hummel is convener.

Mrs. E. Wise will convene the tea to be served on that occasion.

General satisfaction was expressed with the exhibit at the Carmangay fair and the splendid work of the committee in collecting and arranging the exhibit so artistically. An enthusiastic vote of thanks and appreciation was voiced by the members for the energetic efforts of the committee and including all those who contributed toward the display. A letter of appreciation was also ordered sent to the board of directors of the Carmangay Agricultural Society for the courtesy extended and the generous prize awarded. Owing to unavoidable circumstances the invitation from the Lethbridge Association to place a similar exhibit at their fair next week was regretfully declined.

Mrs. R. S. Bond was elected official delegate to the constituency conference which will be held at Barons on Friday, Aug. 31st.

A suggestion to the effect that each member earn a dollar or more in some unusual manner before the December meeting was enthusiastically received. Each contributor will be accepted as payment of annual dues for 1929 and it is hoped that every woman wishing to be a member for next year will report at that meeting.

Mrs. McDougall, Mrs. Cud-

## Prices that Appeal

We did not buy until we examined the goods and selected the quality we could feel satisfied with.

One moment's thought and one inspection on your part will convince you of the real value at the price.

5 lb. Pails .....	\$1.00 each

## Shell Tractor Oil

Will stand the most rigid test. Shell Oil is known the world over for its dependable quality. Give it any test you like and then form your own opinion as to its quality.

It is NOW you need service. We have a Real Stock to choose from and New Goods arriving every day. Be sure of your actual needs by getting your goods NOW.

## W. C. HOSKINS

well, Mrs. G. F. Smith and Mrs. Latiff expressed appreciation for flowers and other gifts sent by the W.I. during illness in their respective families.

The most interesting feature of the afternoon was a demonstration of sweet cream cake by Mrs. Wise, who cleverly explained each step in the process of mixing and also stated that all ingredients used were Alberta products. The finished product, which proved to be perfect in every detail, was served with the refreshments.

A happy social hour followed, completing a most enjoyable afternoon.

Announcing the  
**NEW**  
**UTILITY TRUCK**  
 -another Sensational Chevrolet Value  
**4 Speeds Forward • 4 Wheel Brakes**

NOW Chevrolet presents the New Utility Truck—a low-priced haulage unit embodying every feature of advanced engineering developed through years of experience in commercial car-building and proved by exhaustive testing on the General Motors proving ground.

Typical of the progressive design embodied in this sensational new truck are a four-speed forward transmission, powerful non-locking four-wheel brakes, full ball-bearing steering mechanism, front shock absorber springs, air-bound seat cushions and channel front bumper. In addition, it offers all those basic features which have been so largely instrumental in Chevrolet's tremendous success as the world's largest builder of trucks—rigid rear axle with one-piece banjo-type housing, semi-elliptic springs set parallel to the load, completely new valve-in-head motor with air cleaner, oil filter and positive action vane type oil pump, thermostatic control of water circulation, low loading height, generous road clearance and countless other features of comparable importance.

Visit your Chevrolet dealer and get a trial-load demonstration of this remarkable new truck! It has been developed to meet the modern conditions of business transportation and body types are available for every type of business.
